## NEW Platinum Line Transmitters

CT-880-A

### Temperature or Humidity

- EXPLOSION PROOF
- ON-SITE READOUT
- LINEARIZED OUTPUT

Hy-Cal's Platinum Line Transmitters are designed to provide the best performance for temperature or humidity measurement in applications calling for rugged industrial housings. FM approval is pending for explosion proof rating. These 2-wire, 4-20 mA transmitters use patented thin film sensors. The chemically resistant housing has external zero/span to insure seal integrity. The non-interactive zero/span make calibration easy. An optional readout is available for convenient field readings. Excellent performance specifications are provided by the state-of-the-art circuitry.
